

Good morning,

An "Adaptive Management Model" is inappropriate when it comes to compliance.

The situation with Permit 105809 appears to be a classic case of "Regulatory Capture".

<https://en.wikipedia.org/wiki/>

It is raining heavily again today. Large areas of the landfill are uncovered. Contact water is escaping. The water treatment system continues to fail.

As public servants you might want to at least come and have a look for yourselves.

Regards,

Dave Hutchinson
